

Sunfish Lake Boulevard NW (CSAH 57) @ Alpine Drive NW Reconstruction

Where is the project?

The project is located at the intersection of Sunfish Lake Boulevard NW (CSAH 57) and Alpine Drive NW in the City of Ramsey.

Project Location 

Project Background: Why is this project being done?

In March 2006, an all-way stop was installed at this intersection. While this has significantly improved the safety of this intersection, an all-way stop is not the preferred long term solution, as traffic volumes and development in the area are increasing significantly. This project will include the installation of a traffic signal and the addition of left and right turn lanes for a more efficient, permanent safety solution. In June 2007, Anoka County Highway Department applied for funding through the Highway Safety Improvement Program (HSIP). The grant awarded will be used towards the design and reconstruction of the intersection. Construction is scheduled for summer of 2011.
